### Description

**Rare Mineral Specimens - - Mix 3** makes for a great as a bestowal option for someone special to you. the mineral specimens are one of the most inspiring and interesting collector's items on the market. An original gift for a nature-lover or traveller; the authentic souvenirs found around the world. Be ready for an endless variety of crystal shapes, colours and arrangements, and remember - there are no two identical pieces. Pack contains:Azurite Malachite - Azurite Malachite is a mixture of azurite and malachite, usually in the form of dense clusters. It has a beautiful blue-green colour.Vanadinite - Vanadinite is a mineral from the vanadate group. It occurs very rarely and only locally forms large clusters. The name comes from the element vanadium.Aragonite - Aragonite is believed to promote truth, understanding and uninterrupted perception of reality.Barite Serisite - These minerals are generally used for decorative purposes and have great collector's importance.+1 Randomly picked stone from set Minsp-08 , Please Note: These Minerals are a natural product. Because of this, the sizes of the gemstone pieces may vary.\* Picture for illustration only, stone contents may vary. Our this

section offers an impressive range of products that are sure to catch your attention.
