Description

Unopened Geodes 8x8x4 product would make a great as a favor option for someone special to you.

A beautiful Geode filled with Calcite and Quartz crystals from Morocco, straight from mother earth. Geodes produce a great look when cracked open. Opening them is easy, they are hollower than other geodes. They also tend to produce more crystals.

A geode is a round rock which contains a hollow cavity lined with crystals. Rocks which are completely filled with small compact crystal. Calcite is a carbonate mineral and the most stable polymorph of calcium carbonate. Calcite is thought to amplify thought, improve memory and intellectual capacity; promote mental growth and development.

Small Geodes like (number 5) are often sold in novelty and science stores to people who want to have the experience of opening a geode themselves. They want to be the first human to see the treasure inside. The size, shape and colour of the product you will receive may differ slightly from the product shown in the image.

You may find our selection of products in this this

group to be quite intriguing. This offer could potentially pique your interest.
